

INVITRACK – THE INVISIBLE TRACK DRIVER

NPC and Eutrac have joined forces to fix an industry eye-sore, the new InviTrack driver series puts the entire driver inside the track. No more lumps on the luminaire or on the track. Set your design free and improve the Quality of Light at the same time.

Flicker-free

Miniaturized

Smooth dim

Wide output

Advantages

Completely in-track, enabling a true no-compromise design

Electrically compatible with existing solutions, making switching easy

Flicker free, no visible or perceivable flicker (IEEE1789 NOEL compliant)

Smooth, pleasant dimming curve all the way down to zero via DALI

Efficient, even when dimmed, reducing your environmental footprint

Designed to fit in most tracks with existing retaining collars (M10 or M13). Available in white, grey and black

Specifications

Input voltage	220-240 V
PF	> 0.95
THD	< 20 %
Inrush	>100 drivers on a MCB 16A type B fuse
Efficiency	87 %
Isolation	SELV/Class-II
Output power	28 W
Output current	350-700 mA
Output voltage	24-40 V
Dimming	< 1 %
Size	300×14×23 mm
Luminaire weight, max	2 kg
Lifetime	50.000 hrs
Ambient temperature	-20 °C to 35 °C

Make the future brighter

NPC is a brand with a vision: To make LED lighting healthy and environmentally sound while making unhindered design possible.

InviTrack is truly embedded in the track, setting your design free. On top of that, it outputs flicker-free current that outperforms everything else on the market. Plus, it's efficient at all levels.

By making a switch to the next generation of drivers, you can improve your designs, ensure your position in the market *and* improve life for the people living and working under the light of your luminaires.
